

## Eg-Granuphos Granular Soft-Rock Phosphate

### Applications & features

For Cropping, Pasture, Orchards, Vineyards ,Citrus

- Bio-activated Phosphorus (P)
- Long lasting - controlled release
- Suits low & high (Phosphorus Retention Index (PRI) soils
- granular for ease of application
- Low Cadmium
- Up to 80% of P Citrate Soluble

Superior fertilizers granular Soft-Rock Phosphate biological fertilizer, impregnated with beneficial biology. Designed to enhance the soil by providing balanced phosphorus and trace nutrients including plant available Silica.

Phosphorus availability and speed of delivery is increased through the utilization of colloidal soft rock phosphate, which is ground to a fine powder, then Reconstituted into a granular , designed to enhance phosphorus release and availability.

Eg-Granuphos is typically not bound by high Phosphorus Retention Index (PRI) soils, resulting in increased phosphorus availability with continued use.

#### Packing and Transportation

Eg-Granuphos Available in 25,50 Kg, 1ton Jumbo bags & Bulk loads
